

18 Holes not 800 Houses

Have Your Say !

Save Your Golf Course

Horsham Golf and The Generator Group want to concrete over your Golf Course with up to 800 homes.

The thriving existing courses would go, replaced by a 9-hole pitch and putt. No 18-hole course, with the challenges, interest and beautiful surroundings you enjoy today.

The choice for golfers around Horsham is dwindling. Losing another 18 holes in Horsham is just not on.

It's not just golfers who'd lose out. The new development would disrupt wildlife and the environment and strain local services.

What Can You Do ?

Let Horsham District Council know how you feel.

Ideas on what to say are overleaf

18 Holes not 800 Houses

Have Your Say !

Save Your Golf Course

What Could You Say ?

1 Golfers want to play 18 holes, not 9

- Save the NHS – Play Golf ! - it keeps people physically and mentally healthy.
- Ageing population and increased leisure time - demand for Golf will grow.
- Horsham Golf is a short distance from Horsham Town and is affordably priced.
- Horsham Hockey may want a home but not at the expense of Golfers. Other sites, better connected to the town, are currently available for Hockey.
- A 9 hole pitch and putt is unlikely to be economically viable with a Phase 2 Housing development inevitable.
- A meaningful “Golf College” needs 18 holes, not a 9 hole pitch and putt.

2 Development at Horsham Golf would be a watershed move towards the coalescence of the built-up areas of Southwater and Horsham

3 Any Development at Horsham Golf would put additional stress on the already overburdened local infrastructure – schools, doctors, dentists etc.

4 Increased traffic will cause congestion and further compromise safety on what is already a dangerous route into town for cyclists and pedestrians

5 This development would have a major detrimental impact on Denne Hill, an iconic and easily accessible Green Space for Horsham Residents and home to many rare and protected fauna and flora.
